

TRACK 4

I.V. Pole

TRACK 4, Telescopic IV pole for Spencer Stretchers Cross/Carrera/Enduro/Alto/Ella is a strong and practical, aluminium IV pole easy to fix.

For all models of stretcher except the Ella, the IV pole is secured to the frame of the stretcher. For the Ella it is attached to the arm rails.

Just one movement is sufficient to position it correctly and to find the correct height.

At the end of the pole there are two strong hooks in nylon to which two bags or bottles of IV infusion liquid can be attached.

An elastic wrap round system in Velcro® is supplied to fix the bags or bottles to the pole so that they do not rock.

TECHNICAL DATA

Width open	40 mm
